

Session at #ASM2012 on The Great Indoors: Recent Advances in the Ecology of Built Environments

113 Items

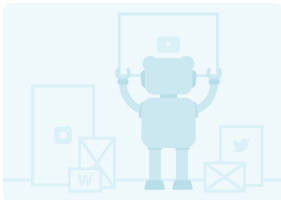

Session at the ASM 2012 meeting on The Great Indoors: Recent Advances in the Ecology of Built Environments

Coming up at the #ASM2012 mtg. "The Great Indoors: Recent Advances in the Ecology of..."

 Phylogenomics

The American Society for Microbiology meeting is starting tomorrow and there are multiple things related to microbiology of the built environment there. These include a session that was...

Brendan Bohannon Laboratory

Uoregon

Research in the Bohannon group is focused on the causes and consequences of microbial biodiversity. Our recent work can be divided into three areas: the study of the fundamental drivers of...

Microbial Analysis of Environmental Surfaces in Hotel Rooms

YouTube

Recorded live at asm2012.

Session Begins

Jonathan Eisen microBEnet: the microbiology of the built environment network

Nicholas Be: Examination of the environmental air microbiome using deep sequencing

Katie Kirsch: A microbial analysis of environmental surfaces in hotel rooms

Mark Hernandez: Stability of airborne microbes to master environmental variables

John Senko: Microbial communities associated with flue gas desulfurization systems

Kimberly Ross: Drinking water delivery networks as microbial ecosystems

Jordan Peccia: The effect of environmental conditions on the allergenic potency of

Aspergillus fumigatus spores

microBEnet: the microbiology of the Built Environment network

microBEnet: the microbiology of the Built Environment network

At the interface of microbial ecology and building science.

Cameron Thrash

@jcamthrash

On to @phylogenomics talk on built environment micro. I can see at least four other tweeps @Dr_Bik @ryneches @surt_lab @tjsharpston #asm2012

Ross says the bottled water she has surveyed has 100x as many microbes as tap water #asm2012

Seth Bordenstein ✓

@Symbioticism

@phylogenomics Abundance or Diversity? Does Ross wager to imply that 100X more microbes in water is good or bad? #asm2012

Jordan Peccia

Jonathan Eisen ✓

@phylogenomics

Now at #ASM2012 is Jordan Peccia eng.yale.edu/peccialab/ who in my mind is one of the absolute best at interdisciplinary microbial studies

Human Occupancy as a Source of Indoor Airborne Bacteria

Plos

Exposure to specific airborne bacteria indoors is linked to infectious and noninfectious adverse health outcomes. However, the sources and origins of bacteria suspended in indoor air are n...
