

August 27, 2015

Dear Colleagues,

We are initiating a broad-area search for an Assistant or untenured Associate Professor in our Bioengineering Department. We would appreciate any recommendations that you may have of outstanding persons who may be potential candidates for this tenure-track position. Given the serious commitment Stanford has to the diversity of its faculty in strengthening the quality of its academic programs, we particularly welcome nominations of and applications from women, members of minority groups, protected veterans and individuals with disabilities, as well as from others who would bring additional dimensions to the university's research, teaching and clinical missions.

A detailed description of our search profile is enclosed. In brief, the successful candidate must have promise of excellence in teaching and research in subject areas relevant to the overall mission of the Department. He or she will be expected to establish an effective, forefront research program in collaboration with the other faculty in the Department, School and/or University. Interdisciplinary programs are currently of special interest.

I would be pleased to receive your recommendations and any comments you may wish to provide by mail or by e-mail at the addresses listed in the announcement, or to hear directly from the candidate(s).

Thank you in advance for your help.

Sincerely,

Markus Covert, Ph.D.
Associate Professor
